

SATCHIDANAND DESHMUKH

Stockton, CA | (669) 296-6186 | satchidanand86@gmail.com | linkedin.com/in/satchidanand22199 | github.com/satchu22

PROFESSIONAL SUMMARY

Software Engineer with M.S. in Computer Science (GPA 3.44) and real production experience in Python, Java, SQL, JavaScript, Docker, and REST APIs. Cut SQL report generation time by **30%** in a live CRM by profiling execution plans and rewriting queries. Currently shipping Python backend features to a production codebase with real users. Built security-hardened applications validated with OWASP penetration testing. Takes full ownership from first commit to deployed fix — ready to contribute from day one.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, C#, Bash

Backend & APIs: Spring Boot, Spring Data JPA, Flask, REST APIs, MySQL, Schema Design, Query Optimization

DevOps & Cloud: Docker, Docker Compose, Jenkins, CI/CD Pipelines, Git, GitHub, Linux CLI, AWS (EC2, IAM)

Security & CS: AES Encryption, OWASP ZAP, SQL Injection Prevention, Data Structures, Algorithms, OOP, Agile/Scrum

PROFESSIONAL EXPERIENCE

Backend Software Developer — Volunteer

Oct 2025 – Present

Saayam For All (saayamforall.org)

Remote

- Contributed to a live production codebase by debugging application issues under the guidance of senior engineers, tracing execution paths and reading logs to identify and resolve defects affecting real users.
- Assisted in improving frontend-backend integration by debugging JavaScript and React components under senior engineer mentorship, validating fixes through structured testing and edge-case verification.
- Drove code quality through structured Git pull requests, peer code reviews, and Agile sprint workflows with a distributed international engineering team across time zones.

Software Engineering Intern

Nov 2022 – Jun 2023

TSL Consulting Pvt Ltd

Pune, India | Full-Time

- Cut SQL report generation time by **30%** by profiling execution plans and rewriting queries with optimized JOINS and targeted indexing — saving internal teams hours of waiting every week.
- Built Python and SQL backend modules for a production CRM used daily by operations teams to manage client data, trigger automated reporting, and run core business workflows.
- Owned production incident response: read stack traces, validated database state, isolated root causes, and shipped fixes under live business pressure — keeping operations running.
- Delivered Python automation scripts eliminating 5+ hours of weekly manual reporting work, replacing error-prone human data entry with a reliable automated process.

PROJECTS

Secure Data Handling Web App | *Python, Flask, MySQL, AES Encryption, OWASP ZAP* | [GitHub](#)

2024

- Built a security-first web app with AES encryption and parameterized queries to block SQL injection — then attacked my own running system with OWASP ZAP, found real vulnerabilities, and patched them. Completed the full build-break-hardens loop.

Zodiac Sign Web Application | *Java, Spring Boot, Spring Data JPA, MySQL, Docker, Docker Compose*

2026

- Designed a production-ready backend from scratch: validated REST endpoints, JPA-managed MySQL schema for persistence, and Docker Compose setup for one-command full-stack deployment — identical in dev and production.

VR Escape Room Game | *Unity, C#, Oculus VR SDK* | [GitHub](#)

2024

- Designed and built the interior game environment of a VR escape room using Unity — modelled, placed, and configured interactive 3D objects within the scene, set up object interaction mechanics, and constructed the in-game background and spatial layout that players navigate through.

Jenkins CI/CD Automation Pipeline | *Jenkins, Python, Docker, Git, Bash* | [GitHub](#)

2024

- Built and configured a Jenkins CI/CD pipeline automating build, test, and deployment workflows — hands-on DevOps experience backed by a real GitHub repo.

CERTIFICATIONS

Agile Scrum Master | *Simplilearn* | Credential ID: 9970847

Mar 2026

Introduction to Kubernetes (LFS158) | *The Linux Foundation* | Credential ID: pwb14napoa

Mar 2026

Docker Foundations Professional Certificate | *LinkedIn Learning*

2025

EDUCATION

University of the Pacific

Stockton, CA

Master of Science in Computer Science — GPA: 3.44

Aug 2023 – May 2025

Padmabhooshan Vasantdada Patil Institute of Technology

Pune, India

Bachelor of Engineering in Computer Science

Jun 2017 – May 2022
